

**We are green in so many ways**

## **Recycled Content Aluminum**

With today's growing consumer interest in environmentally conscious products, Kelly BevWay Systems offers a cost effective way to reduce the net environmental impact. Aluminum is the perfect choice for environmentally-conscious by delivering great performance along with a reduced environmental footprint. Kelly BevWay Systems aluminum tubing is made with a minimum 95% recycled materials. This reduces carbon footprint and contributes to a sustainable product.

## **Environmental**

Aluminum is infinitely recyclable, and nearly 75% of all aluminum ever produced since 1888 is still in use today.

Recycling aluminum uses 95% less energy and produces 95% less greenhouse gas emissions than making metal from raw materials

Kelly BevWay Systems conduit is earth friendly and made in the USA from 100% recycled aluminum.

## **Kelly BevWay & Sustainability**

As a leader in the beverage conduit system industry, we believe it is our responsibility to help shape the direction of the industry to ensure it is continually improving and moving toward a more sustainable future. At Kelly BevWay, sustainability is defined as using our values to build financial success, environmental excellence, and social responsibility in partnership with all stakeholders in order to deliver net long-term benefits to our shareowners, employees, customers, suppliers, and the communities in which we operate
